INTRODUCING SOMERSISLE TERRACE

Lining Alys Beach's main street leading from its town center to the Gulf of Mexico, Somersisle Terrace occupies a prominent place between the retail and resort offerings at either end. As such, it is modeled after the grand rows of Georgian Terraced Houses of London, rising four stories above an elevated stoop and landscaped dooryard. Second-floor living affords Gulf views from its front porch and balcony, while an elevated loggia, court, and pool on its west side enjoys the western sunset. Four bedroom suites are distributed on three floors, with the principal suite, on the third floor, afforded its own private porch and balcony above the public one below. Above it all, a generous fourth-floor eastern terrace forms an outdoor living room while a western one offers dining alfresco before the setting sun. Both enjoy sweeping panoramic views overlooking the town and Gulf.
